

Joshua Eldrick Mapagu

Full-Stack Developer

P: 0993 841 3046 | E: joshuaeldrick@gmail.com

About me

Information Technology student with hands-on experience developing web, mobile, and desktop applications using JavaScript, React, React Native, Node.js, FastAPI, PHP, Java, Python, and MySQL. Experienced in building database-driven systems, REST APIs, CRUD functionality, and user interfaces through academic and personal projects. Strong foundation in object-oriented programming, database management, and application development, with a focus on creating practical and user-friendly software solutions.

Technical Skills

- Programming Languages: Java, Python, PHP, JavaScript
- Frontend Development: HTML5, CSS3, React, JavaScript
- Mobile Development: React Native
- Backend Development: Node.js, FastAPI, PHP
- Database: MySQL, SQL, phpMyAdmin, MySQL Workbench
- Development Concepts: REST APIs, CRUD Operations, Object-Oriented Programming, Database Design
- Tools: Git, GitHub, VS Code
- Networking: IPv4, CIDR, Cisco IOS Fundamentals

Projects

Smart Hospital Management System

Academic Project | PHP, MySQL, JavaScript, HTML, CSS

- Developed a database-driven hospital management system using PHP, MySQL, HTML, CSS, and JavaScript.
- Implemented CRUD functionality for managing hospital and patient records.
- Designed and managed relational database tables using MySQL and phpMyAdmin.
- Developed user interface components for creating, viewing, updating, and managing system records.
- Collaborated with a team of 5 students to plan and develop the application.

Mobile Application

Academic/Personal Project | React Native, Node.js, JavaScript

- Developed a cross-platform mobile application using React Native.
- Built backend functionality using Node.js to support application operations and data processing.
- Implemented communication between the mobile application and backend through APIs.
- Developed interactive mobile interfaces and handled user input and application state.

E-Commerce Desktop Application

Academic Project | Java, Java Swing

- Developed a desktop e-commerce application using Java Swing.
- Applied object-oriented programming principles to structure application components.
- Implemented product management and interactive user interface functionality.
- Designed application components to handle user interactions and product information.

Education

National University Manila — Manila, Philippines
Bachelor of Science in Information Technology

College of Computer and Information Technology
2024 — Present

Relevant Coursework: Data Structures, Database Management Systems, Web Development, Object-Oriented Programming, Networking, Systems Analysis and Design

Our Lady of Perpetual Succor College — Marikina
Information and Communications Technology (ICT)
Graduated with High Honors

2021 — 2023

Relevant coursework and experience included Java programming, database management, web development, and system development.
